DESCRIPTORS: *Ionosphere, Turbulence, *Terrestrial
magnetism, Magnetism, Geophysics, Atmosphere.

On the basis of a statistical theory of turbulence, an
examination is made of the influence of the earth's
magnetic field on the character of ionospheric turbu-
lence. It is shown that for heights of up to about 150
km this influence is negligibly slight. As the altitude
increases, the magnetic field must play an ever larger
role and, at altitudes of about 200 km, it should sub-
